مهندسی ، تأمین و اجرای سیستم هوشمند ساختمان

Instruction of smart equipment installation

1. SPARE is reserved lines for converting the smart system to a conventional one.
2. Each lighting wiring (Line, Neutral and Earth) should be done directly to the distribution panel.
3. The appropriate flush-mount installation height of 7" touch panel, which is labeled with M sign, is 150cm from the finished floor.
4. The appropriate flush-mount installation height of 4.1" touch panel, which is labeled with Z sign, is 145cm from the finished floor.
5. The appropriate flush-mount installation height of 8-gang normal and thermostatic keys which are labeled with 8 and 8T signs, is 135cm from the finished floor.
6. Since the number of wires is too much, please consider labeling all wires in distributed panel.
7. Please wire a land-line in each distribution panel.
8. The appropriate installation height for the distribution panel is 120cm from the finished floor.
9. The AS-BUILT plan and wiring information about distribution panel terminal blocks will be ready after implementation of the smart system.
10. Control of the heating and ventilation system would be done by supervisor's coordination and during the implementation of the whole system.
11. KNX/EIB cable
12. Cat6 SFTP cable
13. 2 pair foiled and twisted cable
14. 4 pair foiled and twisted cable
15. 2 x 1.5 Sound wire
16. Conventional wiring reserved line (SPARE)

| KEY | KEY DESCRIPTION | Installation height (Cm) | KEY | KEY DESCRIPTION | Installation height (Cm) |
|-----|------------------------------|--------------------------|-----|------------------------------------|--------------------------|
| | 4-side Fancoil | | | 8-gang Smart key | 135 |
