

Kenix

The KNX AI Copilot

Main problem of System Integrators

- Fragmented KNX training leads to configuration errors, system faults, and long troubleshooting hours.
- Field technical support is not timely when immediate assistance is needed.
- Limited mastery of scripting languages required for advanced functions.
- Shallow knowledge of the ETS software results in inefficient use and incomplete configurations.

Solution

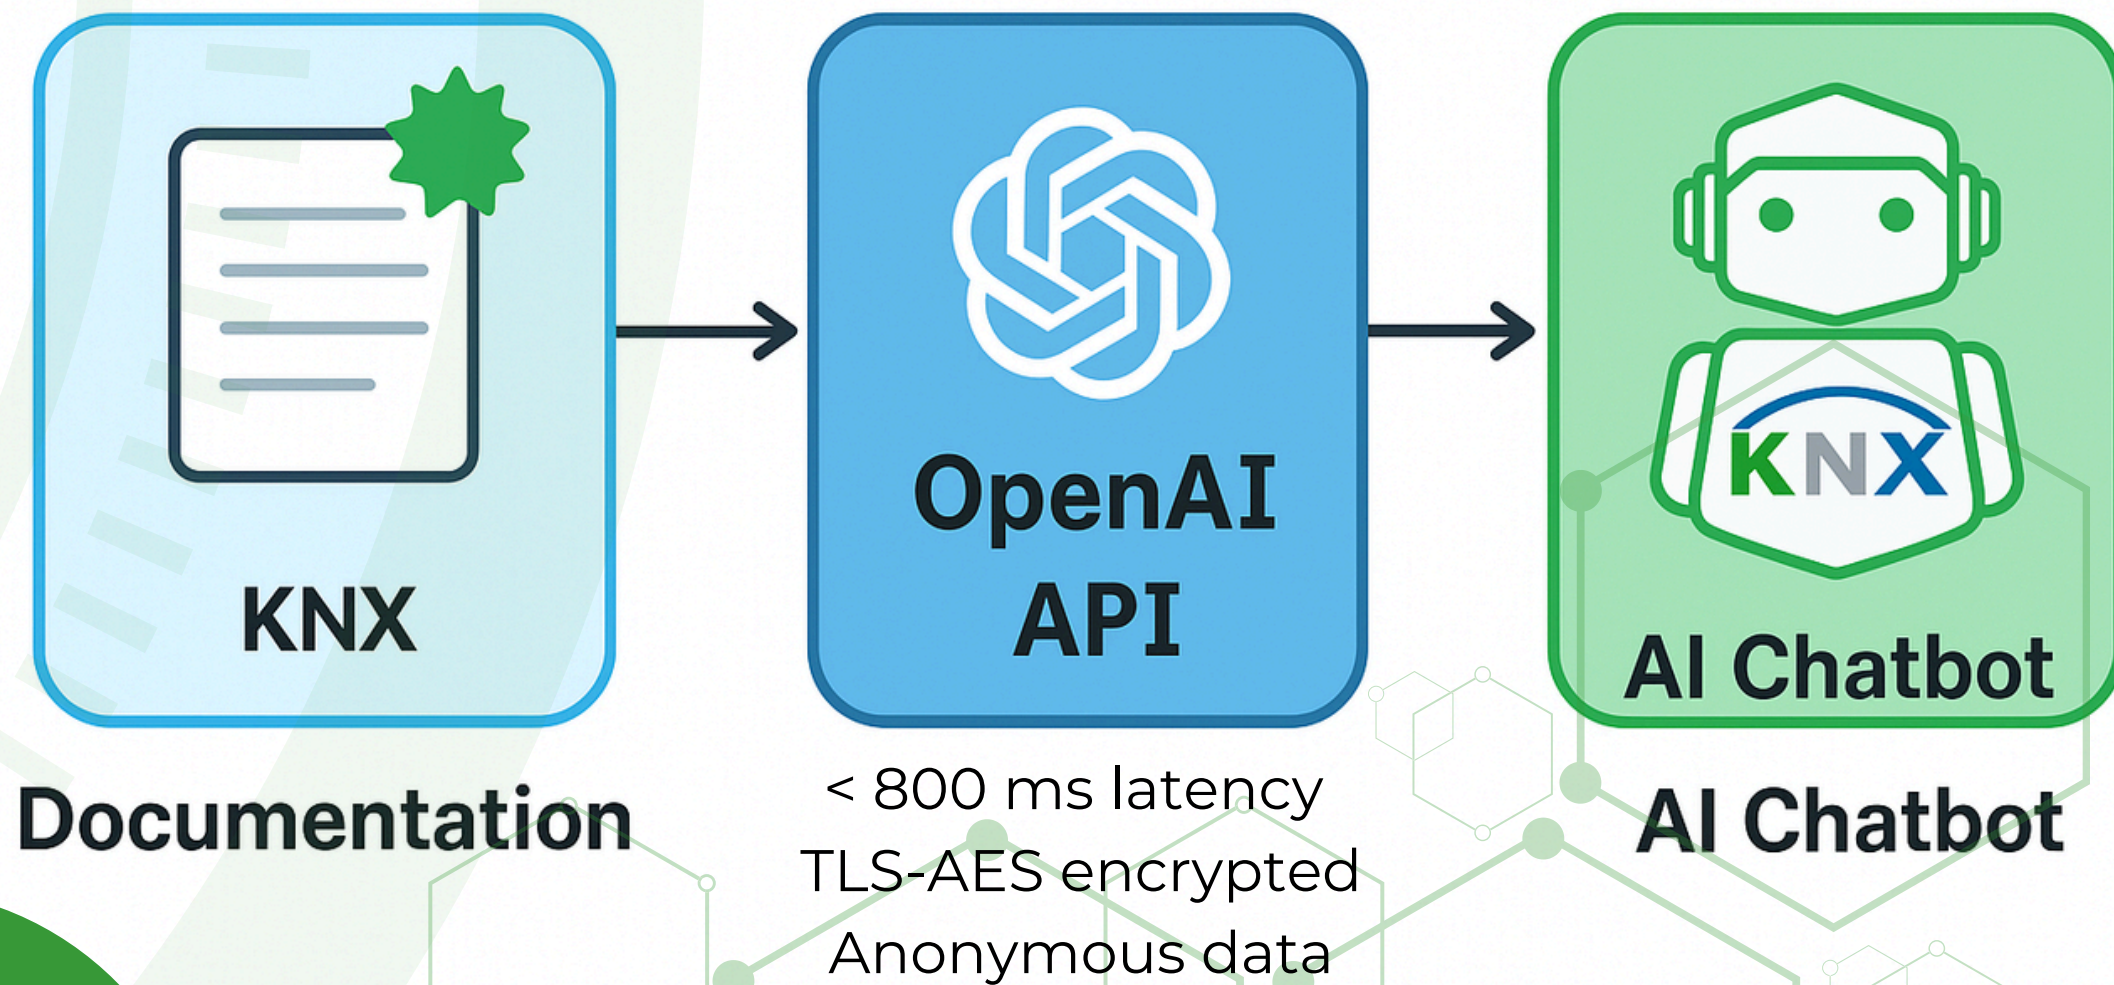

Kenix: The KNX AI Copilot

Instant • Expert • Free:

- Ask anything, any language - Android & Web-app ready
- Instant expert answers on KNX & ETS
- 24/7 copilot that helps you learn more, every day
- Auto-builds & validates scripts in seconds

Supports you on-site, during design & commissioning, and even in training, with precise answers, clear explanations and up-to-date content.
